PROFESSIONAL SUMMARY

Flutter Developer with 4+ years of experience shipping production mobile applications. I own features end-to-end — from architecture and clean code to CI/CD and store releases. I have collaborated with cross-functional teams across borders, working as the mobile specialist alongside UI and backend engineers. Currently deepening my native iOS skills with SwiftUI.

WORK EXPERIENCE

Flutter Developer | Stone Street Syndicate Aug 2025 – Present

Remote · United States

- Took over a partially built app at a US photography startup as the sole mobile developer, driving it to a fully functional production product across Flutter mobile, web admin panel, and backend integrations, collaborating directly with the founder.
- Architected and deployed a multi-stage 'Casting Calls' marketplace engine with integrated Stripe payments and RevenueCat subscriptions; extended the Flutter web admin panel to display and moderate job posts with an email blast feature for all users.
- Implemented a robust notification architecture with deep-linking and automated re-engagement triggers using Node.js Cloud Functions.
- Built Travel Boards, a feature where creatives post their travel availability and clients discover and book them by location, using Google Places API.

Freelance Flutter Developer | Upwork Aug 2021 – Present

Remote · International

- Architected and delivered 15+ Flutter & React.js applications for international clients, maintaining code quality, scalability, and on-time delivery.
- Managed full project lifecycles for 10+ clients — from requirements gathering and UI implementation to cloud API integration and store deployment.

Mobile & Front-End Development Trainee | Information Technology Institute (ITI) Mar 2023 – Jul 2023

Hybrid · Egypt

- Completed an intensive 4-month program covering Flutter, React, Angular, and React Native with hands-on project work.
- Collaborated in a 5-member Agile team to build IPark, a smart parking solution, as the graduation project.

TECHNICAL SKILLS

Languages & Frameworks: Dart (Flutter), JavaScript (React.js, Node.js), Swift / SwiftUI (currently learning)
State Management: BLoC, Provider, Redux
Architecture: Clean Architecture, MVVM, Dependency Injection, SOLID Principles
Backend & APIs: REST API, Firebase, Google Cloud (Vision, Maps, Places), OpenAI, Gemini, Stripe, RevenueCat, Authentication
Databases & Storage: Firestore, SQLite, Hive
DevOps & Tooling: Git, GitHub, Codemagic CI/CD, Jira, Android Studio, VS Code, Figma
Testing & Quality: Unit Testing, Widget Testing, Async Programming (Futures, Streams)
Deployment: Google Play & App Store release management

KEY PROJECTS

Stone Street – Photography Booking Platform · Stone Street Syndicate Aug 2025 – Present

Tech: Flutter, Provider, Firebase (Auth, Firestore, Cloud Functions), Stripe, RevenueCat, CI/CD (Codemagic)

App Store | Google Play

- Completed missing business logic and replaced static data with real backend integrations across the full app.
- Implemented photographer discovery, booking flow, and in-app monetization with Stripe & RevenueCat.
- Built a full push notification system with deep-linking and weekly scheduled notifications; extended the Flutter web admin panel with job moderation and email blast capabilities.

Penpoints – AI-Powered Spelling Coach for Children · Client Project Sep 2024 – Aug 2025

Tech: Flutter, Flutter Web, BLoC, Firebase (Auth, Firestore, Cloud Vision API, Cloud Functions), OpenAI API (ChatGPT), Text-to-Speech, QR Code

App Store | Google Play

- Built an innovative spelling coach where children write words on paper, photograph them, and receive instant AI-powered feedback — errors highlighted with red rectangles and letter-by-letter confidence scores.
- Delivered cross-platform (mobile + web) experience with grade-specific exercises and real-time audio feedback via Text-to-Speech.

NannyFinder – Family & Nanny Matching Platform · Client Project May 2022 – Sep 2024

Tech: Flutter, Flutter Web, Firebase (Auth, Firestore, Storage, Hosting, Dynamic Links), BLoC

App Store | Google Play | Web

- Built a dual-sided platform connecting families with nannies, featuring advanced search filters, profile browsing, and in-app job applications.
- Architected the app for both mobile and web using a single Flutter codebase, maintaining simultaneous releases on Google Play, App Store, and web.

AKM – Concrete Order Tracking Platform · Client Project Oct 2023 – Apr 2024

Tech: Flutter, REST API, Firebase (Firestore, Analytics, FCM), Google Cloud (Places API, Maps), Location Tracking, BLoC, Localization (English & Arabic)

App Store | Google Play | Demo

- Built a construction-industry app for streamlined concrete order management with real-time delivery tracking and quality assurance workflows.
- Supported full bilingual experience (English & Arabic) with localization and RTL layout.

EDUCATION

Bachelor of Commerce – Accounting & Finance | Cairo University 2015 – 2019

Giza, Egypt
