PROFESSIONAL SUMMARY

Flutter Engineer with 4+ years of experience building and shipping production-grade cross-platform applications for iOS and Android. Specialized in scalable Flutter architecture, Firebase ecosystems, payment integrations (Stripe & RevenueCat), and CI/CD automation. Delivered 15+ published applications for startups and international clients, with hands-on ownership across architecture, deployment, performance optimization, and App Store/Google Play releases.

WORK EXPERIENCE

Flutter Developer

Stone Street Syndicate

08/2025 – Present
Remote, United States

- As the sole Flutter developer, managed the architectural migration and complete full-production release of the platform on the App Store and Google Play.
- Built core marketplace workflows including booking systems, job boards, and travel management features.
- Developed Firebase Cloud Functions to automate notifications, reminders, and marketing workflows.
- Expanded the Flutter Web admin dashboard with advanced CRUD operations and management tools.
- Stabilized subscription and payment flows using Stripe and RevenueCat integrations.
- Implemented automated CI/CD pipelines with Codemagic to streamline deployments and releases.

Freelance Flutter Developer

Upwork

08/2021 – Present
Remote

- Delivered 15+ cross-platform mobile applications for international clients across education, logistics, booking, and marketplace domains.
- Collaborated directly with UI/UX designers and backend teams to align design specs and optimize RESTful API communication layers.
- Integrated secure authentication systems, Firebase services, and optimized local caching solutions.
- Managed end-to-end App Store and Google Play deployments, ensuring 100% compliance with platform guidelines.
- Partnered directly with founders and stakeholders in remote Agile environments to translate business requirements into scalable code.

Mobile & Front-End Development Trainee

Information Technology Institute (ITI)

03/2023 – 07/2023
Hybrid, Egypt

- Completed intensive training in Flutter, React, Angular, and mobile application development.
- Collaborated within an Agile team to develop a smart parking graduation project.

KEY PROJECTS

Stone Street - Photography Booking Platform

Stone Street Syndicate

08/2025 – Present

Flutter, Firebase, Stripe, RevenueCat, CI/CD

App Store | Play Store

- Spearheaded the architectural migration and complete launch of the platform from a static codebase into a live, scalable production app on the App Store and Google Play, implementing an automated CI/CD pipeline via Codemagic.
- Engineered core two-sided marketplace workflows (Job Board and dynamic Travel Board) and developed Firebase Cloud Functions to automate user reminders, push notifications, and targeted marketing email blasts.
- Scaled the existing Flutter Web Admin Panel by implementing complex CRUD operations for marketplace management and automated email/notification blast engines, while stabilizing monetization pipelines through resolving legacy RevenueCat bugs and building secure Stripe components.

Penpoints - AI-Powered Spelling Coach

09/2024 – 08/2025

Upwork
Flutter, Firebase, OpenAI API, Cloud Vision, QR Code

App Store | Play Store

- Developed an interactive educational application featuring an AI-driven image processing engine that analyzes handwritten text.
- Integrated OpenAI API and Google Cloud Vision API to deliver real-time, low-latency performance feedback on user submissions.
- Implemented advanced device features including multi-language Text-to-Speech (TTS) modules, secure QR code generation, and a reactive Firebase backend architecture.

AKM - Concrete Order Tracking Platform

10/2023 – 04/2024

Upwork
Flutter, Firebase, REST APIs, Google Maps

App Store | Demo

- Engineered a logistics and order tracking mobile application featuring real-time vehicle location updates and delivery status streams.
- Integrated Google Maps API with custom map styles, polyline routing, and location services to track transit assets.
- Designed a localized, fully bilingual (English & Arabic) UI architecture, incorporating state-managed notifications and Firebase Analytics.

TECHNICAL SKILLS

Languages & Frameworks

Dart (Flutter), JavaScript (React.js, Node.js), Swift / SwiftUI (currently learning)

State Management

BLoC, Provider, Redux

Architecture

Clean Architecture, MVVM, Dependency Injection, SOLID Principles

Backend & APIs

REST API, Firebase, Google Cloud (Vision, Maps, Places), OpenAI, Gemini, Stripe, RevenueCat, Authentication

Databases & Storage

Firestore, SQLite, Hive

DevOps & Tooling

Git, GitHub, Codemagic CI/CD, Jira, Xcode, VS Code, Figma

Testing & Quality

Unit Testing, Async Programming (Futures, Streams)

Deployment

Google Play & App Store release management

EDUCATION

Bachelor of Commerce - Accounting & Finance

2015 – 2019

Cairo University

Giza, Egypt

Successfully transitioned into software engineering in 2021 as a freelance Flutter developer, later broadening technical expertise into full web & front-end engineering through ITI's intensive program in 2023.

CERTIFICATIONS

- Meta iOS UI Development - Coursera
- Meta Front-End Developer - Coursera
