PROFESSIONAL SUMMARY

Flutter Mobile Developer with 4+ years of experience delivering scalable, production-ready mobile applications for clients worldwide. Specialized in Clean Architecture, Firebase, AI integrations, REST APIs, and shipping apps to the App Store and Google Play.

WORK EXPERIENCE

Flutter Developer | Stone Street Syndicate

Aug 2025 – Present

Remote · United States

- Served as the sole Flutter developer, partnering directly with the founder to architect, maintain, and scale a production photography booking platform across iOS, Android, and Flutter Web.
- Developed a multi-stage marketplace engine ("Casting Calls") with Stripe payment processing and RevenueCat subscription management.
- Integrated REST APIs and Firebase services to support authentication, real-time data synchronization, and scalable production features.
- Implemented automated push notifications with Firebase Cloud Functions, deep linking, and user re-engagement workflows.
- Built the "Travel Boards" feature using the Google Places API to filter and display creative profiles based on geolocation.
- Extended the Flutter web admin dashboard with content moderation, email notifications, and operational management tools.

Freelance Flutter Developer | Upwork

Aug 2021 – Present

Remote · International

- Delivered 15+ production applications for clients across the US, UAE, France, and South Africa.
- Handled full project lifecycles, including requirement analysis, UI implementation, REST API integration, and production store deployment.
- Engineered dynamic, JSON-driven layouts and structured app architectures to facilitate flexible updates with minimal client-side code changes.

Front-End & Mobile Development Trainee | Information Technology Institute (ITI)

Mar 2023 – Jul 2023

Hybrid · Egypt

- Completed a 4-month intensive technical program specializing in cross-platform mobile and web frontend ecosystems.
- Co-developed "IPark" (a smart parking mobile solution) with a 5-member Agile team as a graduation project.

SKILLS

Languages & Frameworks:

Flutter, Dart, SwiftUI, React.js, JavaScript, TypeScript

Architecture & State Management:

Clean Architecture, BLoC, Cubit, Provider, MVVM, OOP, SOLID Principles

Backend & APIs:

REST APIs, Firebase (Authentication, Firestore, Cloud Functions, FCM)

Testing:

Unit Testing, Widget Testing

Integrations:

Stripe, RevenueCat, OpenAI API, Google Cloud (Vision, Maps, Places)

Tools & DevOps:

Git, GitHub, CI/CD (Codemagic), App Store Connect, Google Play Console

KEY PROJECTS

Stone Street – Photography Booking Platform

Aug 2025 – Present

Tech: Flutter, Provider, Firebase (Auth, Firestore, Cloud Functions), Stripe, RevenueCat, CI/CD (Codemagic)

[App Store](#) | [Google Play](#)

- Integrated REST APIs and replaced static data with production backend services across the application.
- Implemented photographer discovery, booking workflows, Stripe payment integration, and RevenueCat subscriptions.
- Built a complete push notification system with Firebase Cloud Functions, deep linking, and weekly scheduled notifications while extending the Flutter web admin panel with moderation and email management features.

Penpoints – AI-Powered Spelling Coach for Children

Sep 2024 – Aug 2025

Tech: Flutter, Flutter Web, BLoC, Firebase (Auth, Firestore, Cloud Vision API, Cloud Functions), OpenAI API (ChatGPT), Text-to-Speech, QR Code

[App Store](#) | [Google Play](#)

- Built an AI-powered spelling coach that analyzes handwritten words using Google Cloud Vision API and OpenAI API to provide instant feedback with highlighted errors and letter-level confidence scores.
- Delivered cross-platform (mobile + web) experience with grade-specific exercises and real-time audio feedback via Text-to-Speech.

NannyFinder – Family & Nanny Matching Platform

May 2022 – Sep 2024

Tech: Flutter, Flutter Web, Firebase (Auth, Firestore, Storage, Hosting, Dynamic Links), BLoC

[Google Play](#) | [Web](#)

- Built a dual-sided platform connecting families with nannies, featuring advanced search filters, profile browsing, and in-app job applications.
- Architected a shared Flutter codebase for iOS, Android, and Web while maintaining synchronized feature releases across all platforms.

AKM – Concrete Order Tracking Platform

Oct 2023 – Apr 2024

Tech: Flutter, REST API, Firebase (Firestore, Analytics, FCM), Google Cloud (Places API, Maps), Location Tracking, BLoC, Localization (English & Arabic)

[App Store](#) | [Demo](#)

- Built a production order tracking application with REST API integration, real-time delivery tracking, location services, and bilingual (English/Arabic) support.

EDUCATION

Bachelor of Commerce – Accounting & Finance | Cairo University

Sep 2015 – Jul 2019

Giza, Egypt
